ARITHMETIC plus  
RELIGION and  
RESPECT

## SAXON GEOMETRY 1st Edition 2013

Dear Parents and Students:

Student should memorize all Properties, Formulas, Postulates, Theorems and Definitions as they are presented in the lessons. See the Table of Contents on page xv.

Student(s) should study all of the Examples and Lesson Practice then work the Practice sets.

Enclosed is a sample lesson plan of how we would like you to indicate the grade for each lesson.

**Tests are assigned periodically throughout the year and must be sent to school.**  
**Students must show how the problem is worked along with the answer. The in-home tutor (parent) should correct and grade the test to determine if the student has difficulty with any problem(s).**

**You will need to purchase a Scientific Calculator.**

Please do not hesitate to call or email if you have any questions.

*If you give a child a fish, you feed him for a day.  
If you teach a child to fish, you feed him for life!*
